

## The French Presidential and Legislative Elections of 2002

The French elections of 2002 provided an opportunity to assess the political development of the regime, and in particular developments within the complex phenomenon of French presidentialism within a party system. In this thorough analysis, John Gaffney looks at the institutional, political and electoral moments of 2002, which saw both presidential and legislative elections and a major upheaval in the political life of France. Bringing together a range of scholars, the volume includes contributions from historians, political scientists, economists, cultural studies experts and media experts to offer a thorough and textured analysis of French politics.
