

Under the Acacia Tree

This is a fictitious account of the life and work of a farming family during the reign of the New Kingdom ruler Queen Hatshepsut. The story describes the challenging lives that they lived, their loves and sorrows, as well as their hopes and achievements and follows the fortunes of the family including one member who becomes a soldier, another the wife of a workman in the tomb of the Pharaoh and a third a dancer at court. The main story however revolves around the father and son who farm for a living in what sometimes prove to be times of great anxiety but through all their difficulties they all remain loyal to each other and succeed in making a success of life.
